Our objective is **help** the companies and event organizers to recover the control of the **situation**. We offer a solution at a low cost that is going to help the reactivation of the activities and its durability.

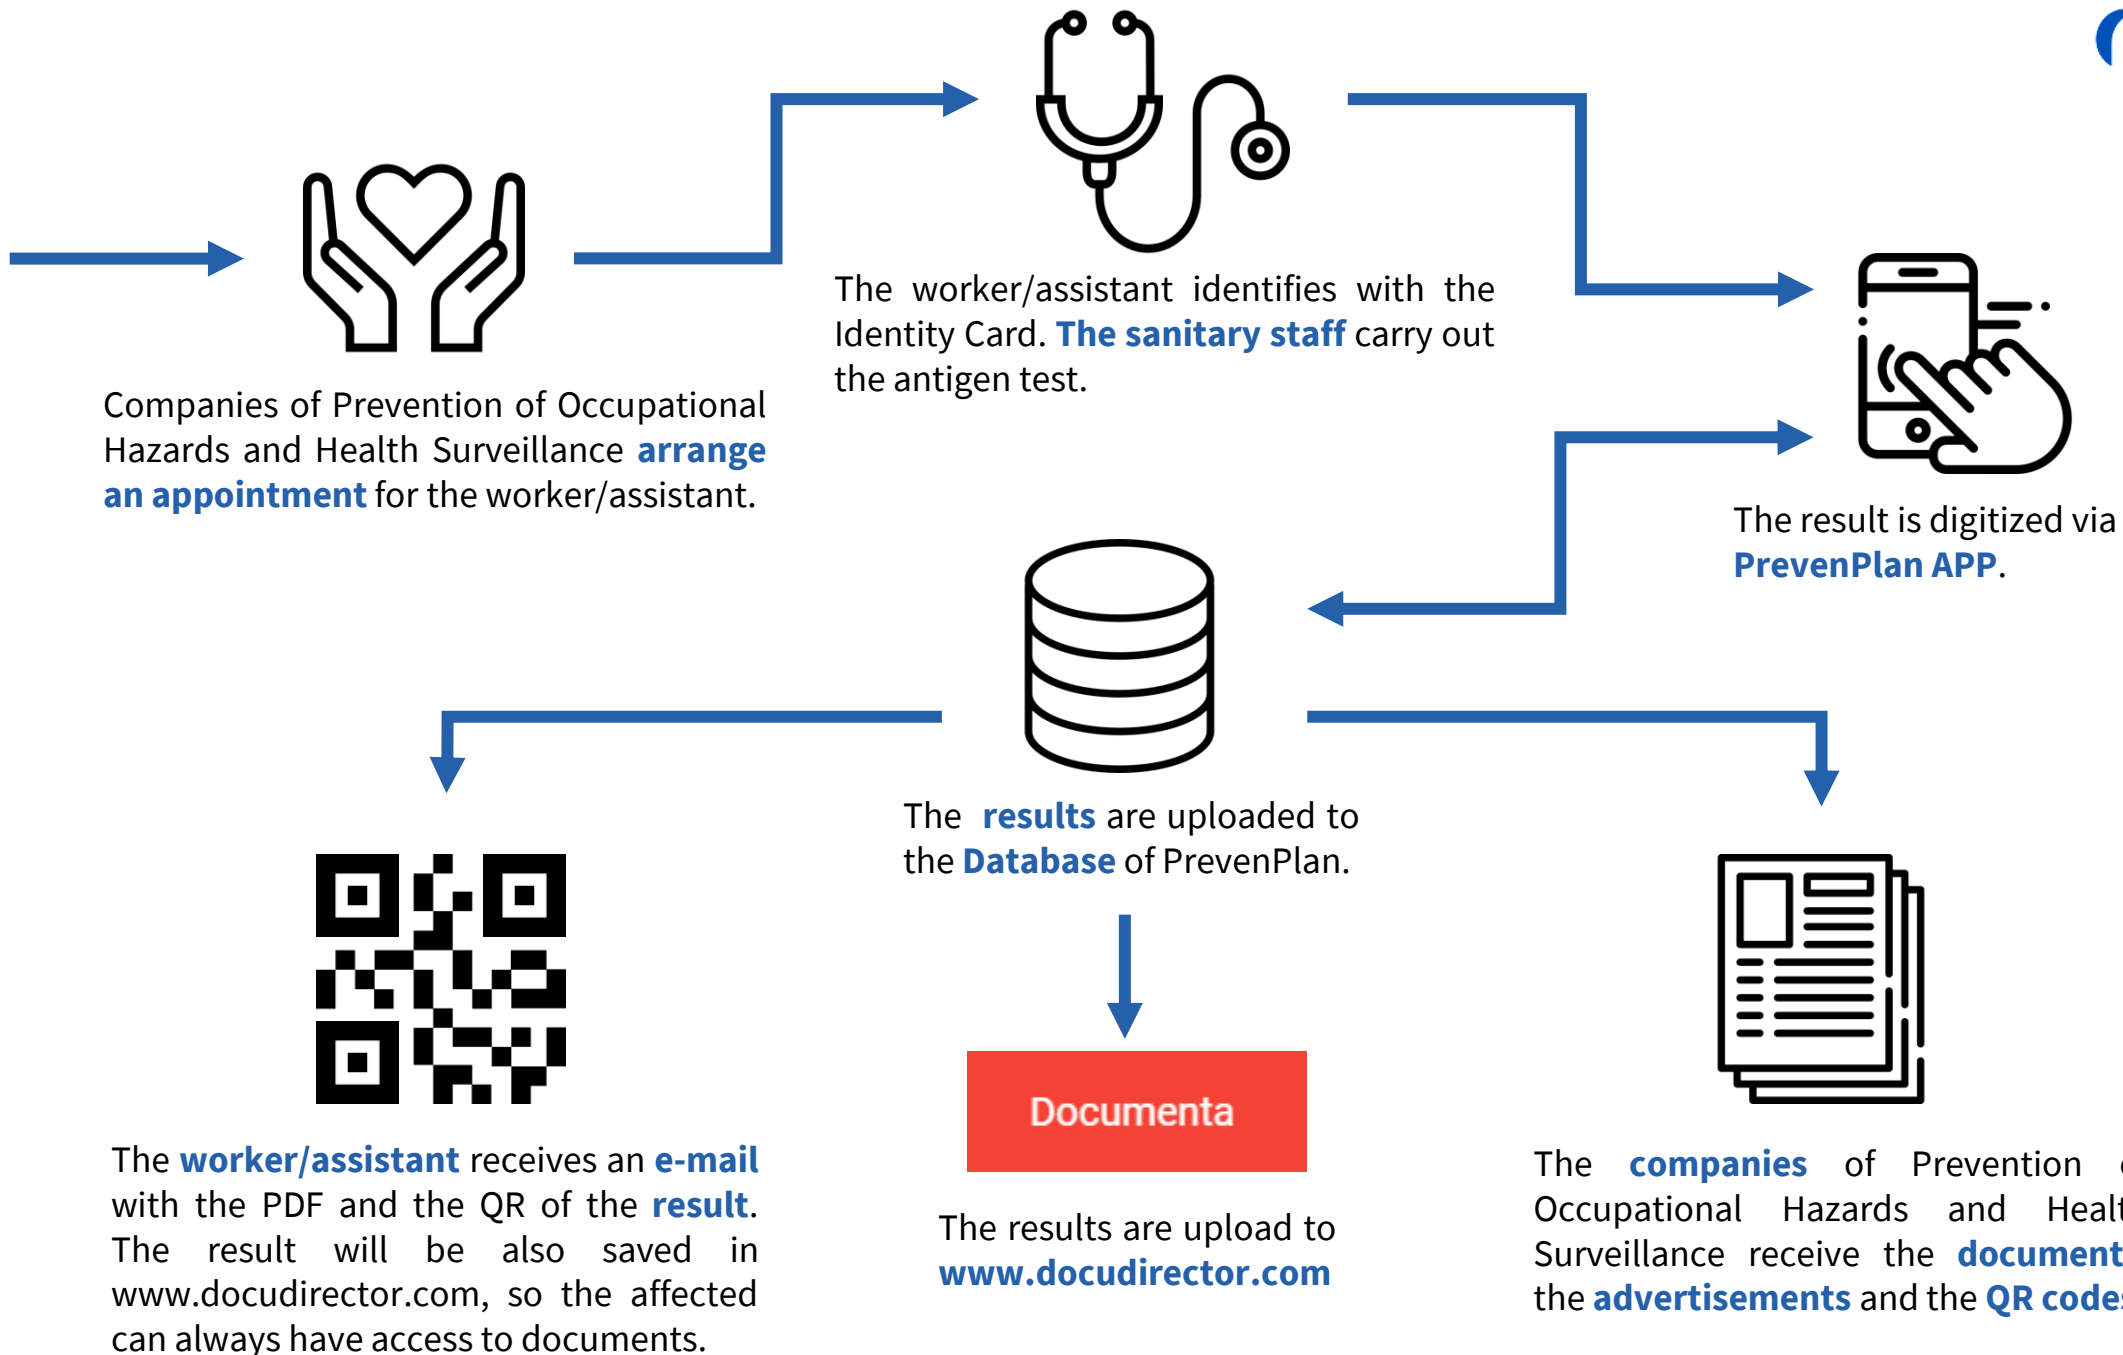

The **adaptation** to the new reality is **necessary**. Has to be secure for our participants access to events. With the new tools that ease the management, the control and the advertisement we can assure the security to the assistants and workers.

The **new antigen test**, that is faster and has a low cost, allows to diagnose assistants and workers in real time for the organization of “**COVID-FREE**” events.

Asartec has developed **PrevenPlan APP**, a mobile application for the new test realization. The application is connected to the data base of our desktop application PrevenPlan, that helps companies of **Prevention of Occupational Hazards and Health Surveillance** to manage the entries in business and events.

Documenta

The results are upload to www.docudirector.com
